**Subject:** Trinseo Release, Bristol Township, Bucks County NFA BY EPA REMOVAL!

Good morning –

Just got off this morning's drinking water coordination call. Happy to report, unless conditions change, this will be the last call.

Results for all three rounds of the river water sampling were ND. Water facilities continuing to monitor/sample - all ND. Aqua PA has or will stop intermittent operations and will resume normal ops. NJ American expects to modify sampling approach and resume normal ops. PWD will continue sampling into next week and will continue to coordinate with PA DEP water folks. Apparently, they have some updated notices on their website. I have not had a chance to look.

UC reported cleanup efforts at facility ongoing under USCG direction. Stormwater basin that originally collected and discharged the product is completely empty. No further risk of discharge. Minor burps of product every now and then in vicinity of the storm drain outlet, nothing significant. Theses are being address, as needed through vac truck ops.

No further assistance from EPA anticipated! Thanks to everyone for the team effort. I appreciate that that is not the case in other regions.

I am still on the clock but am hoping things wind down. I would hope that from here its about tying up loose ends. Although I know there may be some more fire drills related to media or congressional requests.

-Kelley
